

Olga Gavrushenko

Pittsburg, CA | (415) 510-0829 | olga.gavrushenko@gmail.com | [linkedin/olga-gavrushenko](https://www.linkedin.com/in/olga-gavrushenko)

PROFESSIONAL SUMMARY

Software Development Engineer in Test with 10 years of experience in software testing and quality assurance, specializing in web applications and API testing. Passionate about building scalable test automation frameworks and improving software quality through robust UI and API testing using Playwright, Selenium WebDriver, and RestAssured. Have experience in software development.

KEY SKILLS

- **QA & Test Automation:** TestRail, Jira, UI and API testing, test strategy, test planning, requirements analysis, regression, smoke, functional, system, and integration testing
- **Automation Tools:** Playwright (TypeScript/JavaScript), Selenium WebDriver (Java), RestAssured, Karate, TestNG, Maven, Gradle, Allure
- **Non-Functional Testing:** Cross-browser, localization, internationalization, security, accessibility (WCAG 2.1 AA)
- **Programming & Web:** TypeScript, JavaScript, Java, HTML, CSS
- **APIs & Databases:** REST, GraphQL, MySQL, MongoDB, Sequelize, Mongoose
- **Frameworks & Platforms:** Node.js, Express, React, AWS, CI/CD pipelines

RELEVANT PROFESSIONAL EXPERIENCE

QA Lead | **Sephora** | San Francisco, CA

Oct 2023 – June 2025

Tech Stack: TestRail, Jira, Selenium WebDriver (Java), Karate (Java), Git, CI/CD pipelines

- Defined test plans, strategies, and methodologies to achieve testing objectives and support delivery of high-quality software using manual and automated approaches.
- Managed Test Plans and Test Runs in TestRail; established and maintained best practices across the team.
- Developed, supported, and troubleshoot test automation frameworks, standards, processes, and best practices (Confluence).
- Maintained and guided execution of automated test suites; analyzed results to ensure software met or exceeded technical and quality standards.
- Researched new technologies and features; drove design, implementation, testing, and release efforts, and partnered with software engineers to define complete and testable requirements.
- Defined test plans, strategies, and methodologies to achieve testing objectives and support delivery of high-quality software using manual and automated approaches.
- Led two QA teams simultaneously: a UI team of 4–6 testers covering web (UFE), iOS, and Android, and a backend team of 3–5 testers focused on microservices testing.

Full Stack Software Developer (Part-time) | **Amortize Me LLC** | Irvine, CA

Oct 2022 – Aug 2025

Tech Stack: JavaScript, TypeScript, Node.js, Express, React, Playwright, Gmail API, REST APIs, MongoDB

- Implemented end-to-end test automation using Playwright (TypeScript) to validate critical user flows across web application features.
- Designed and implemented backend architecture, including data models and REST API endpoints.
- Built and enhanced client- and server-side features, delivering responsive UI components across mobile and desktop.
- Integrated Gmail APIs and implemented scheduled and webhook-based workflows to support business processes.

EPAM Systems Inc | San Jose, CA

Global digital and product engineering company providing software development, platform and AI-driven solutions.

Software Engineer in Test | |

Oct 2021 – June 2022

Tech Stack: Java, Git, Jenkins, Selenium WebDriver, BDD (Cucumber), TestNG, CI/CD

- Conducted manual functional, automation, and exploratory testing to ensure product quality.
- Developed automation testing using BDD framework, Selenium WebDriver, and BeedooUI1.0 to streamline testing processes and reduce testing time.
- Designed and updated test cases, as well as the automation test framework, to ensure comprehensive testing coverage and minimize the risk of defects.
- Implemented a working test automation framework, updated test cases to cover all functionality, and incorporated 100% smoke tests and ACL API tests as part of the CI/CD process.

Test Automation Engineer | |

Feb 2020 – July 2021

Tech Stack: Java, Git, Jenkins, Selenium WebDriver, TestNG, Maven, RestAssured, Gradle, Allure, EPAM Report Portal

- Developed comprehensive end-to-end and API test plans, and created automation scripts for regression test cases to ensure safe deployment to staging for stakeholder testing.
- Automated UI and API testing using Selenium WebDriver with TestNG, Maven, Allure, and RestAssured with Gradle and EPAM report portal.
- Proactively reviewed daily test runs, identified and troubleshooted issues, reported application issues, and fixed automation scripts.
- Designed a robust framework for API testing using RestAssured, Gradle, and EPAM report portal to streamline testing processes and ensure consistent results.

EDUCATION

Bachelor's Degree in Physics and Computer Science — Belarussian State Pedagogical University, Belarus

PROFESSIONAL DEVELOPMENT

- UC Berkeley Extension — Coding Boot Camp, 2023
- Code with Mosh — Ultimate Java: Fundamentals (Certificate)
- Coursera — Generative AI: Prompt Engineering
