

Olga Gavrushenko

Pittsburg, CA | (415) 510-0829 | olga.gavrushenko@gmail.com | [linkedin/olga-gavrushenko/](https://www.linkedin.com/in/olga-gavrushenko/)

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 3+ years of hands-on development experience building responsive web applications using React, TypeScript, and Node.js. Strong foundation in frontend architecture, REST API design, and third-party integrations. 10+ years working in software engineering environments, bringing deep understanding of system design, testing strategy, CI/CD, and production reliability. Passionate about clean architecture, performance optimization, and delivering scalable user-focused solutions.

TECHNICAL SKILLS

- **Frontend:** React, JavaScript (ES6+), TypeScript, HTML5, CSS3, Responsive Design, Component Architecture
- **Backend:** Node.js, Express, REST APIs, GraphQL, Sequelize, Mongoose, MySQL, MongoDB
- **Cloud & DevOps:** AWS, CI/CD pipelines, Webhooks, API integrations, Docker
- **Testing & Quality:** Selenium, RestAssured, Karate, Automation framework design, API testing, Cross-browser testing
- **Languages:** JavaScript, TypeScript, Java

PROFESSIONAL EXPERIENCE

Full Stack Software Developer

Amortize Me LLC — Irvine, CA

Oct 2022 – Aug 2025

- Designed and implemented backend architecture using Node.js and Express, including data models and RESTful APIs.
- Developed reusable and responsive React components for mobile and desktop applications.
- Built frontend features using TypeScript, modern JavaScript, HTML, and CSS.
- Integrated Gmail API and implemented scheduled jobs and webhook-based workflows.
- Improved system reliability through structured API validation and error handling.
- Collaborated on feature planning, architecture decisions, and production deployment.

Tech Stack: React, TypeScript, Node.js, Express, MongoDB, MySQL, AWS

QA Lead

Sephora — San Francisco, CA

Oct 2023 – June 2025

- Collaborated with engineering teams to define testable requirements and improve frontend and API reliability.
- Contributed to CI/CD pipeline improvements to support faster, safer releases.
- Partnered with developers during feature design to ensure scalable and maintainable solutions.

Quality Assurance Engineer / Test Automation Engineer

EPAM Systems — San Jose, CA

Feb 2020 – June 2022

- Built and maintained automated UI and API test frameworks using Selenium, RestAssured, and Java.
- Supported frontend and backend teams through regression strategy and integration validation.
- Participated in Agile development cycles and release planning.

EDUCATION

Bachelor's Degree in Physics and Computer Science - *Belarussian State Pedagogical University, Belarus*

PROFESSIONAL DEVELOPMENT

- **UC Berkeley Extension** — Coding Boot Camp, 2023
- **Code with Mosh** — Ultimate Java: Fundamentals (Certificate 2025)
